THE MISSION OF THE KANSAS CHAPTER OF PRIMA

To improve the operation of
local government and related
public agencies through proven
risk management techniques

Web site: <http://kansasprima.org/>
National PRIMA: www.primacentral.org

Kansas PRIMA

Kansas PRIMA is a state chapter of the National PRIMA organization. Members of the Kansas PRIMA represent all types of public entities such as cities, counties, school districts, water districts and airports.

WHY RISK MANAGEMENT?

Why? Because Risk Management affects every part of your organization and its opportunity for success. What appears "unpredictable" may be controlled with the use of such techniques as safety/loss control, cost-effective insurance, and self-retention. A risk management professional studies the "unpredictable" events and tries to turn them into controllable (and in some cases even predictable) events and therefore preventable events. Risk management professionals, by banding together in association, benefit from each others' experience and expertise.

WHY JOIN PRIMA?

Kansas PRIMA members help each other in developing insurance bid specifications and loss control and prevention policies, compliance with state and federal environmental and safety laws and regulations. Members assist each other with information retrieval using the Internet.

Program Agenda
